

CineAlta™ Product Information

Camera Remote Control Unit – RM-B750

The RM-B750 Remote Control Unit has been designed to establish a highly mobile and fully controllable camera system in the field by integrating control capability.

It can be connected directly to the HDW-F900 and HDC-F950 CineAlta cameras and camcorders, and also connected to an HDW-250 HDCAM™ portable VTR or SRW-1 CineAlta portable video recorder. The combination of an LCD touch-panel screen and direct push buttons enables full parameter adjustment of the camera to be controlled. When necessary, basic tape transport functions of a portable VTR can be controlled*. For further operational convenience, the RM-B750 has a Memory Stick™ media card slot so that various setup parameters can be stored and transferred between camcorders.

For details about this product, please ask sales representatives from Sony or contact local Sony office.

* VTR REC START/STOP can also be assigned by the assignable switch.

*This model can be connected to SRW-1 via SRPC-1 (the digital video processor unit for SRW-1).

Specifications

Power requirements	DC 10.5 - 30 V (Max), Supplied from camera/camcorder
Operating temperature	+5°C to +40°C
Storage temperature	-20°C to +55°C
Mass	Approx. 0.7 kg (1 lb 9 oz)
